

Data and Privacy File Guides

Other data: Location Information

September 2025

File name Location Information.csv

File description This file contains information about location subscriptions associated with your devices, when you chose to share your location with others, and about your items when you chose to share them with others.

Why Apple keeps this information Apple retains this information in order to provide the service, to understand user behavior and preferences, to measure feature performance, and to improve software design.

Notify When Found Subscriptions Information

Contains information related to location subscriptions when the user turns on the "Notify When Found" feature in Find My.

Field Name	Details
Apple Account Number	The Apple Account identifying number
Apple Push Notification Token	Apple Push Notification Service token of the subscriber
Subscription Identifier	Randomly generated identifier associated with the subscription
Subscription Mode	Subscription mode: SHALLOW - Location subscription that gets created when the FindMy app is launched LIVE - Live locations view in App and other Applications using Find My view (Messages, Contacts etc.) PROACTIVE - Widget subscription for background location updates at all times BACKGROUND_PROACTIVE - Slow location updates to all friends, when none of the above types are active OWNER_SUBSCRIBE - Similar to background proactive, but used in some scenarios where active location sharing is from a Watch
Subscription Status	The status of a subscription (e.g., active, deleted)
Subscription Type	The type of subscription associated with either devices or people (e.g., "FRIENDS" means individuals found in the People tab, "DEVICES" means the user's device)
Subscription Updated Timestamp	Date and time on which the subscription was last updated
UDID	The unique device identifier of the device creating the Notify When Found subscription

Friends Location Information

Contains information related to location subscriptions that get created when users share their location with each other, which is retained in encrypted form for up to 7 days depending on the type of subscription.

Field Name	Details
Location	The encrypted location
Location Published Timestamp	Date and time the encrypted location was saved by the Find My server
Location Saved Timestamp	Date and time the encrypted location was last updated
Location Timestamp	Date and time the encrypted location was captured by the device
Requesting UDID	The unique device identifier of the device requesting the encrypted location
Subscription Identifier	Randomly generated identifier associated with the subscription
Subscription Mode	Subscription mode: SHALLOW - Location subscription that gets created when the FindMy app is launched LIVE - Live locations view in App and other Applications using Find My view (Messages, Contacts etc.) PROACTIVE - Widget subscription for background location updates all the time BACKGROUND_PROACTIVE - Slow location updates to all friends, when none of the above types are active OWNER_SUBSCRIBE - Similar to background proactive, but used in some scenarios where active location sharing is from a Watch
Subscription Status	The status of a subscription
Subscription Type	The type of subscription associated with the friend locations
Subscription Updated Timestamp	Date and time the subscription was last updated

Connected Device Location Information

Contains information about the location subscription of your devices at times when you chose to share your location with others.

Field Name	Details
Accessory Identifier	The hashed public key associated with the connected accessory
Apple Account Number	The Apple Account identifying number

Field Name	Details
Location	The encrypted location
Location Published Timestamp	Date and time the encrypted location was saved by the Find My server
Location Saved Timestamp	Date and time the encrypted location was last updated by the Find My server
Location Timestamp	Date and time the encrypted location was captured by the device
Sharing UDID	The unique device identifier of the device sharing its encrypted location

Share Item Information

Contains information used for accessory item sharing metadata.

Field Name	Details
Item Share Identifier	Randomly generated identifier associated with the item sharing event
Item Share Information	Details about a shared item, including its owner, creation and expiration dates, and the type of share (e.g., item share, item share location, unwanted tracking, or own device submitting keys)

Share Item Location Information

Contains information related to sharing of lost items with others via secure links.

Field Name	Details
Item Share Access Granted	Whether the others you shared the item with successfully viewed its location
Item Share Access Type	The authentication method associated with the item share
Item Share Access Updated Timestamp	Date and time access to the shared item was last updated
Item Share Identifier	Randomly generated identifier associated with the item sharing event
